**D-A-S CONSTRUCTION CO. STAFF VOLUNTEERS
AT OPERATION ZERO LANDFILL**

(CLEVELAND – August 11, 2008) — In an effort to continue promoting the ideals of sustainability amongst it's staff and within the community at large, a group of D-A-S employees rolled up their sleeves and dedicated an afternoon to volunteer work for ZeroLandfill, an award winning beneficial reuse program that supports the supply needs of local artists and arts educators while reducing pressure on local landfill capacity. The event took place at ZeroLandfill's facility located in the Kids in Need Resource Center in MidTown on Friday, August 1, 2008.

Members of D-A-S' staff sorted specification samples including fabric, wood, ceramic tile, and carpet that were collected from the architectural and construction communities. They helped to empty binders and sort paper into recycling bins, as well as tear out carpet pieces from sample books. These items will be re-purposed back into the community through use by local artists, disadvantaged students and under funded teachers.

ZeroLandfill projects are built on collaboration and wise actions that reduce landfill pressure while enriching the community. To date, nearly 90,000 pounds of specification waste has been diverted from the waste stream and repurposed as materials that nourish community arts programs and classrooms.

D-A-S CONSTRUCTION CO. STAFF VOLUNTEERS AT ZERO LANDFILL
