**D-A-S CONSTRUCTION CO. IMPLEMENTS COMPANY WIDE
RECYCLING PROGRAM AT ITS JOB SITES & HOME OFFICE**

(CLEVELAND - July 3, 2007) — In its continuing effort to promote green building, D-A-S Construction Co. has committed to spending thousands of dollars towards recycling at both its construction job sites as well as the company's home office. D-A-S' internal Green Building Committee made the decision to go forward with the recycling program to make a statement regarding the importance of green building construction.

Plans for recycling on D-A-S job sites include the set up of recycling dumpsters, within which all recyclable construction materials and debris will be placed. In-office recycling plans include the addition of recycling bins at each employee's desk for paper, as well as the central placement of recycling bins for plastics and aluminum cans. Within the next several weeks the company will distribute eco-friendly mugs to its employees and prohibit the use of Styrofoam coffee cups within the office. In addition to these changes, the company will begin using organic mulch and recycled paper at its office. Dozens of other eco-friendly changes are anticipated over the next several months.

D-A-S Construction Co.'s Green Building Committee is made up of a cross functional group of both field and office employees who are dedicated to preserving the environment through green building construction. Their ongoing
